SOUTH FLORIDA WATER MANAGEMENT DISTRICT
ENVIRONMENTAL RESOURCE PERMIT NO. 49-00477-S
DATE ISSUED: January 12, 2015

PERMITTEE: DEERFIELD LAND CORPORATION
14901 S ORANGE BLOSSOM TRAIL
ORLANDO, FL  32837

PROJECT DESCRIPTION: Modification of an Environmental Resource Permit to authorize construction and operation of a project that includes a stormwater management system serving 16.54 acres of a residential development known as Lot 8 Multi-Family.

PROJECT LOCATION: OSCEOLA COUNTY, SEC 03 TWP 25S RGE 29E

PERMIT DURATION: See Special Condition No:1.

This is to notify you of the District's agency action for Permit Application No. 140806-6, dated August 6, 2014. This action is taken pursuant to the provisions of Chapter 373, Part IV, Florida Statutes (F.S).

Based on the information provided, District rules have been adhered to and an Environmental Resource Permit is in effect for this project subject to:

1. Not receiving a filed request for a Chapter 120, Florida Statutes, administrative hearing.
2. the attached 18 General Conditions (See Pages : 2 - 4 of 5),
3. the attached 10 Special Conditions (See Pages : 5 - 5 of 5) and
4. the attached 4 Exhibit(s)

Should you object to these conditions, please refer to the attached "Notice of Rights" which addresses the procedures to be followed if you desire a public hearing or other review of the proposed agency action. Please contact this office if you have any questions concerning this matter. If we do not hear from you in accordance with the "Notice of Rights," we will assume that you concur with the District's action.

CERTIFICATE OF SERVICE

I HEREBY CERTIFY THAT this written notice has been mailed or electronically transmitted to the Permittee (and the persons listed in the attached distribution list) this 12th day of January, 2015, in accordance with Section 120.60(3), F.S. Notice was also electronically posted on this date through a link on the home page of the District's website (my.sfwmd.gov/ePermitting).

ENVIRONMENTAL RESOURCE PERMIT

CHAPTER 40E-4 (10/95)

40E-4.321 Duration of Permits

(1) Unless revoked or otherwise modified the duration of an environmental resource permit issued under this chapter or Chapter 40E-40, F.A.C. is as follows:

(a) For a conceptual approval, two years from the date of issuance or the date specified as a condition of the permit, unless within that period an application for an individual or standard general permit is filed for any portion of the project. If an application for an environmental resource permit is filed, then the conceptual approval remains valid until final action is taken on the environmental resource permit application. If the application is granted, then the conceptual approval is valid for an additional two years from the date of issuance of the permit. Conceptual approvals which have no individual or standard general environmental resource permit applications filed for a period of two years shall expire automatically at the end of the two year period.

(b) For a conceptual approval filed concurrently with a development of regional impact (DRI) application for development approval (ADA) and a local government comprehensive plan amendment, the duration of the conceptual approval shall be two years from whichever one of the following occurs at the latest date:

1. the effective date of the local government's comprehensive plan amendment.
2. the effective date of the local government development order.
3. the date on which the District issues the conceptual approval, or
4. the latest date of the resolution of any Chapter 120.57, F.A.C., administrative proceeding or other legal appeals.

(c) For an individual or standard general environmental resource permit, five years from the date of issuance or such amount of time as made a condition of the permit.

(d) For a noticed general permit issued pursuant to chapter 40E-400, F.A.C., five years from the date the notice of intent to use the permit is provided to the District.

(2)(a) Unless prescribed by special permit condition, permits expire automatically according to the timeframes indicated in this rule. If application for extension is made in writing pursuant to subsection (3), the permit shall remain in full force and effect until:

1. the Governing Board takes action on an application for extension of an individual permit, or
2. staff takes action on an application for extension of a standard general permit.

(b) Installation of the project outfall structure shall not constitute a vesting of the permit.

(3) The permit extension shall be issued provided that a permittee files a written request with the District showing good cause prior to the expiration of the permit. For the purpose of this rule, good cause shall mean a set of extenuating circumstances outside of the control of the permittee. Requests for extensions, which shall include documentation of the extenuating circumstances and how they have delayed this project, will not be accepted more than 180 days prior to the expiration date.

(4) Substantial modifications to Conceptual Approvals will extend the duration of the Conceptual Approval for two years from the date of issuance of the modification. For the purposes of this section, the term "substantial modification" shall mean a modification which is reasonably expected to lead to substantially different water resource or environmental impacts which require a detailed review.

(5) Substantial modifications to individual or standard general environmental resource permits issued pursuant to a permit application extend the duration of the permit for three years from the date of issuance of the modification. Individual or standard general environmental resource permit modifications do not extend the duration of a conceptual approval.

(6) Permit modifications issued pursuant to subsection 40E-4.331(2)(b), F.A.C. (letter modifications) do not extend the duration of a permit.

(7) Failure to complete construction or alteration of the surface water management system and obtain operation phase approval from the District within the permit duration shall require a new permit authorization in order to continue construction unless a permit extension is granted.

Specific authority 373.044, 373.113 F.S. Law Implemented 373.413, 373.416, 373.419, 373.426 F.S. History—New 9-3-81, Amended 1-31-82, 12-1-82, Formerly 16K-4 07(4), Amended 7-1-86, 4/20/94, Amended 7-1-86, 4/20/94, 10-3-95
GENERAL CONDITIONS

1. All activities shall be implemented following the plans, specifications and performance criteria approved by this permit. Any deviations must be authorized in a permit modification in accordance with Rule 62-330.315, F.A.C. Any deviations that are not so authorized shall subject the permittee to enforcement action and revocation of the permit under Chapter 373, F.S. (2012).

2. A complete copy of this permit shall be kept at the work site of the permitted activity during the construction phase, and shall be available for review at the work site upon request by the Agency staff. The permittee shall require the contractor to review the complete permit prior to beginning construction.

3. Activities shall be conducted in a manner that does not cause or contribute to violations of state water quality standards. Performance-based erosion and sediment control best management practices shall be installed immediately prior to, and be maintained during and after construction as needed, to prevent adverse impacts to the water resources and adjacent lands. Such practices shall be in accordance with the "State of Florida Erosion and Sediment Control Designer and Reviewer Manual" (Florida Department of Environmental Protection and Florida Department of Transportation June 2007), and the "Florida Stormwater Erosion and Sedimentation Control Inspector's Manual" (Florida Department of Environmental Protection, Nonpoint Source Management Section, Tallahassee, Florida, July 2008), unless a project-specific erosion and sediment control plan is approved or other water quality control measures are required as part of the permit.

4. At least 48 hours prior to beginning the authorized activities, the permittee shall submit to the Agency a fully executed Form 62-330.350(1), "Construction Commencement Notice" indicating the expected start and completion dates. If available, an Agency website that fulfills this notification requirement may be used in lieu of the form.

5. Unless the permit is transferred under Rule 62-330.340, F.A.C., or transferred to an operating entity under Rule 62-330.310, F.A.C., the permittee is liable to comply with the plans, terms and conditions of the permit for the life of the project or activity.

6. Within 30 days after completing construction of the entire project, or any independent portion of the project, the permittee shall provide the following to the Agency, as applicable:
   a. For an individual, private single-family residential dwelling unit, duplex, triplex, or quadruplex - "Construction Completion and Inspection Certification for Activities Associated With a Private Single-Family Dwelling Unit" [Form 62-330.310(3)]; or
   b. For all other activities - "As-Built Certification and Request for Conversion to Operational Phase" [Form 62-330.310(1)].
   c. If available, an Agency website that fulfills this certification requirement may be used in lieu of the form.

7. If the final operation and maintenance entity is a third party:
   a. Prior to sales of any lot or unit served by the activity and within one year of permit issuance, or within 30 days of as-built certification, whichever comes first, the permittee shall submit, as applicable, a copy of the operation and maintenance documents (see sections 12.3 thru 12.3.3 of Applicant's Handbook Volume I) as filed with the Department of State, Division of Corporations and a copy of any easement, plat, or deed restriction needed to operate or maintain the project, as recorded with the Clerk of the Court in the County in which the activity is located.
   b. Within 30 days of submittal of the as-built certification, the permittee shall submit "Request for Transfer of Environmental Resource Permit to the Perpetual Operation Entity" [Form 62-330.310(2)] to transfer the permit to the operation and maintenance entity, along with the documentation requested in the form. If available, an Agency website that fulfills this transfer requirement may be used in lieu of the form.

8. The permittee shall notify the Agency in writing of changes required by any other regulatory agency that
require changes to the permitted activity, and any required modification of this permit must be obtained prior to implementing the changes.

9. This permit does not:
   a. Convey to the permittee any property rights or privileges, or any other rights or privileges other than those specified herein or in Chapter 62-330, F.A.C.;
   b. Convey to the permittee or create in the permittee any interest in real property;
   c. Relieve the permittee from the need to obtain and comply with any other required federal, state, and local authorization, law, rule, or ordinance; or
   d. Authorize any entrance upon or work on property that is not owned, held in easement, or controlled by the permittee.

10. Prior to conducting any activities on state-owned submerged lands or other lands of the state, title to which is vested in the Board of Trustees of the Internal Improvement Trust Fund, the permittee must receive all necessary approvals and authorizations under Chapters 253 and 258, F.S. Written authorization that requires formal execution by the Board of Trustees of the Internal Improvement Trust Fund shall not be considered received until it has been fully executed.

11. The permittee shall hold and save the Agency harmless from any and all damages, claims, or liabilities that may arise by reason of the construction, alteration, operation, maintenance, removal, abandonment or use of any project authorized by the permit.

12. The permittee shall notify the Agency in writing:
   a. Immediately if any previously submitted information is discovered to be inaccurate; and
   b. Within 30 days of any conveyance or division of ownership or control of the property or the system, other than conveyance via a long-term lease, and the new owner shall request transfer of the permit in accordance with Rule 62-330.340, F.A.C. This does not apply to the sale of lots or units in residential or commercial subdivisions or condominiums where the stormwater management system has been completed and converted to the operation phase.

13. Upon reasonable notice to the permittee, Agency staff with proper identification shall have permission to enter, inspect, sample and test the project or activities to ensure conformity with the plans and specifications authorized in the permit.

14. If any prehistoric or historic artifacts, such as pottery or ceramics, stone tools or metal implements, dugout canoes, or any other physical remains that could be associated with Native American cultures, or early colonial or American settlement are encountered at any time within the project site area, work involving subsurface disturbance in the immediate vicinity of such discoveries shall cease. The permittee or other designee shall contact the Florida Department of State, Division of Historical Resources, Compliance and Review Section, at (850) 245-6333 or (800) 847-7278, as well as the appropriate permitting agency office. Such subsurface work shall not resume without verbal or written authorization from the Division of Historical Resources. If unmarked human remains are encountered, all work shall stop immediately and notification shall be provided in accordance with Section 872.05, F.S.

15. Any delineation of the extent of a wetland or other surface water submitted as part of the permit application, including plans or other supporting documentation, shall not be considered binding unless a specific condition of this permit or a formal determination under Rule 62-330.201, F.A.C., provides otherwise.

16. The permittee shall provide routine maintenance of all components of the stormwater management system to remove trapped sediments and debris. Removed materials shall be disposed of in a landfill or other
GENERAL CONDITIONS

uplands in a manner that does not require a permit under Chapter 62-330, F.A.C., or cause violations of state water quality standards.

17. This permit is issued based on the applicant's submitted information that reasonably demonstrates that adverse water resource-related impacts will not be caused by the completed permit activity. If any adverse impacts result, the Agency will require the permittee to eliminate the cause, obtain any necessary permit modification, and take any necessary corrective actions to resolve the adverse impacts.

18. A Recorded Notice of Environmental Resource Permit may be recorded in the county public records in accordance with Rule 62-330.090(7), F.A.C. Such notice is not an encumbrance upon the property.
1. The construction phase of this permit shall expire on January 12, 2020.

2. Operation of the stormwater management system shall be the responsibility of OSCEOLA CORPORATE CENTER MASTER PROPERTY OWNERS ASSOCIATION. Within one year of permit issuance or concurrent with the engineering certification of construction completion, whichever comes first, the permittee shall submit a copy of the recorded deed restrictions (or declaration of condominium, if applicable), a copy of the filed articles of incorporation, and a copy of the certificate of incorporation for the association.

3. Discharge Facilities:

   Structure: CS-201
   1-18' WIDE BROAD CRESTED weir with crest at elev. 86.75' NGVD 29.
   1-3.75" dia. CIRCULAR ORIFICE with invert at elev. 85.75' NGVD 29.
   Receiving body: Existing Wetland 19
   Control elev: 85.75 feet NGVD 29.

4. Lake side slopes shall be no steeper than 4:1 (horizontal:vertical) to a depth of two feet below the control elevation. Side slopes shall be nurtured or planted from 2 feet below to 1 foot above control elevation to insure vegetative growth, unless shown on the plans.

5. A stable, permanent and accessible elevation reference shall be established on or within one hundred (100) feet of all permitted discharge structures no later than the submission of the certification report. The location of the elevation reference must be noted on or with the certification report.

6. Minimum building floor elevation: BASIN: 201 (Ex 201B & 308D) - 91.00 feet NGVD 29.

7. Minimum road crown elevation: Basin: 201 (Ex 201B & 308D) - 87.75 feet NGVD 29.

8. The exhibits and special conditions in this permit apply only to this application. They do not supersede or delete any requirements for other applications covered in Permit No. 49-00477-S unless otherwise specified herein.

9. Prior to any future construction, the permittee shall apply for and receive a permit modification. As part of the permit application, the applicant for that phase shall provide documentation verifying that the proposed construction is consistent with the design of the master stormwater management system, including the land use and site grading assumptions.

10. A buffer monitoring and maintenance program shall be implemented in accordance with Exhibit No. 3. The monitoring program shall extend for a period of 3 years with annual reports submitted to District staff. At the end of the first monitoring period the mitigation area shall contain an 80% survival of planted vegetation. The 80% survival rate shall be maintained throughout the remainder of the monitoring program, with replanting as necessary. If transitional and upland species do not achieve an 80% coverage within the initial year of the monitoring program, native species shall be planted in accordance with the maintenance program. At the end of the 3 year monitoring program the entire upland buffer area shall contain an 80% survival of planted vegetation and an 80% coverage of desirable upland species.
Last Date For Agency Action: January 12, 2015

INDIVIDUAL ENVIRONMENTAL RESOURCE PERMIT STAFF REPORT

Project Name: Lot 8 Multi-Family
Permit No.: 49-00477-S
Application No.: 140806-6
Application Type: Environmental Resource (Construction/Operation Modification)
Location: Osceola County, S03/T25S/R29E
Permittee: Deerfield Land Corporation
Operating Entity: Osceola Corporate Center Master Property Owners Association
Project Area: 16.54 acres
Permit Area: 16.54 acres
Project Land Use: Residential

Drainage Basin: LAKE TOHOPEKALIGA
Receiving Body: Existing Wetlands via Existing Master System Class: CLASS III

Special Drainage District: NA
Conservation Easement To District: No
Sovereign Submerged Lands: No

PROJECT PURPOSE:
Modification of an Environmental Resource Permit to authorize construction and operation of a project that includes a stormwater management system serving 16.54 acres of a residential development known as Lot 8 Multi-Family.
PROJECT EVALUATION:

PROJECT SITE DESCRIPTION:

The site is located east of John Young Parkway, south of Osceola Parkway, south of the intersection of Centerview Boulevard and Greenwald Way within the Osceola Corporate Center Lot 8 - Basin 201 in Osceola County.

There are permitted water management facilities within the project area that this application proposes to modify, namely the relocation of the existing Pond 201. The site consists of pine flatwoods, improved pasture and a pond.

There are no wetlands or other surface waters located within or affected by the proposed project. Upland buffers and upland mitigation previously provided as mitigation are now proposed for impact. (See the "Wetlands" discussion, below.)

PROPOSED PROJECT:

Construction proposed consists of the storm water management system serving the improvements to Lot 8 Multi-Family.

The proposed improvements will consist of the construction of a multi-family apartment complex with associated amenities. The water management system will consist of one wet detention pond for the required water quality treatment and attenuation prior to discharge from the site and into Wetland 19 of the Osceola Corporate Center master system. The project limits lie within the Lake Tohopekaliga Drainage Basin.

Consistent with previous permits, water quality criteria consists of the greater of one inch of runoff over the drainage basin or 2.5 inches of runoff times the percent impervious coverage and is provided in excess in the design of the proposed storm water management pond, Pond 201.

**WATER QUANTITY:**

**Discharge Rate:**

As shown in the table below, the proposed project discharge is within the allowable limit for the area. The discharge identified below corresponds to the total allowable discharge rate, or 47.69 cfs going into Wetland 19 (Application No. 050913-13 - 37.88 cfs from Basin/Pond 308 and Application No. 010918-19 - 9.81 cfs from Basin 201).

WETLANDS:

There are no wetlands on the site, however, it does contain uplands included in a previously permitted mitigation plan. This application proposes the release of a 5.43 acre upland area from a conservation easement recorded over it in order to develop the area. The 5.43 acre pine flatwoods was mitigation for an estimated 0.85 acre wetland impact area under a previous permit (App. No. 970718-2). The wetland area was characterized as being in “good condition”. The UMAM functional loss of the original wetland impact is calculated to be 0.68 UMAM units. Mitigation to offset the original wetland impact will be the use of 0.63 fresh water forested UMAM credits from the Reedy Creek Mitigation Bank. (These credits had been previously acquired to offset impacts under another project (Osceola Crossings, App. No. 130620-12, also within the the same permit area). The impact decreased and the permit was modified to credit back the 0.63 credits. (Those credits are being used now under this application.) An additional 0.05
freshwater forested UMAM credits will be obtained from the Hatchineha Ranch Mitigation Bank. A copy of the letter of reservation is attached as a part of Exhibit 3.

In addition, additional regrading of the buffer it is necessary adjacent to Wetlands 12 and 19, to the west and east of the project respectively. The buffers (totaling 0.68 acres) are proposed to be regraded and replanted. A planting and monitoring plan is attached as a part of Exhibit 3. Since the impacts are temporary, to the buffer and, being replanted, no further mitigation is required. A work schedule for the activities is attached as a part of Exhibit 3.

The Osceola Corporate Center currently contains 468.47 acres of preserved wetlands. This application includes the acquisition of additional mitigation that will be obtained from the Hatchineha Ranch Mitigation Bank. As such, a small portion of mitigation will be "out-of basin" vs. the large amount preserved on-site and therefore "in-basin". staff has determined that no unacceptable cumulative impacts are anticipated as the result of the proposed activities.

A partial release of conservation easement covering the buffers and upland preservation area was approved at the November 13, 2014 Governing Board meeting.

Wetland Inventory:

The wetland inventory reflects 5.43 acres of upland preservation that is now proposed for impact.

CERTIFICATION, OPERATION, AND MAINTENANCE:

Pursuant to Chapter 62-330.310 Florida Administrative Code (F.A.C.), Individual Permits will not be converted from the construction phase to the operation phase until construction completion certification of the project is submitted to and accepted by the District. This includes compliance with all permit conditions, except for any long term maintenance and monitoring requirements. It is suggested that the permittee retain the services of an appropriate professional registered in the State of Florida for periodic observation of construction of the project.

For projects permitted with an operating entity that is different from the permittee, it should be noted that until the construction completion certification is accepted by the District and the permit is transferred to an acceptable operating entity pursuant to Sections 12.1-12.3 of the Applicant's Handbook Volume I and Section 62-330.310, F.A.C., the permittee is liable for operation and maintenance in compliance with the terms and conditions of this permit.

In accordance with Section 373.416(2), F.S., unless revoked or abandoned, all stormwater management systems and works permitted under Part IV of Chapter 373, F.S., must be operated and maintained in perpetuity.

The efficiency of stormwater management systems, dams, impoundments, and most other project components will decrease over time without periodic maintenance. The operation and maintenance entity must perform periodic inspections to identify if there are any deficiencies in structural integrity, degradation due to insufficient maintenance, or improper operation of projects that may endanger public health, safety, or welfare, or the water resources. If deficiencies are found, the operation and maintenance entity will be responsible for correcting the deficiencies in a timely manner to prevent compromises to flood protection and water quality. See Section 12.4 of Applicant's Handbook Volume I for Minimum Operation and Maintenance Standards.
The applicant has indicated that Toho Water Authority will be used as a source for reclaim irrigation water for the project.

The applicant has indicated that dewatering is required for construction of this project. Prior to any construction activities, the applicant will submit a dewatering application for District approval.

This permit does not release the permittee from obtaining all necessary Water Use authorization(s) prior to the commencement of activities which will require such authorization, including construction dewatering and irrigation.

**CERP:**

The proposed project is not located within or adjacent to a Comprehensive Everglades Restoration Project component.

**Potable Water Supplier:**

Toho Water Authority

**Waste Water System/Supplier:**

Toho Water Authority

**Right-Of-Way Permit Status:**

A District Right-of-Way Permit is not required for this project.

**DRI Status:**

This project is not a DRI.

**Historical/Archeological Resources:**

The District has received correspondence from the Florida Department of State, Division of Historical Resources indicating that no significant archaeological or historical resources are recorded in the project area and the project is therefore unlikely to have an effect upon any such properties.

**DEO/CZM Consistency Review:**

The issuance of this permit constitutes a finding of consistency with the Florida Coastal Management Program.

**Enforcement:**

There has been no enforcement activity associated with this application.

**STAFF REVIEW:**

**DIVISION APPROVAL:**

NOTICE OF RIGHTS

As required by Sections 120.569(1), and 120.60(3), Fla. Stat., the following is notice of the opportunities which may be available for administrative hearing or judicial review when the substantial interests of a party are determined by an agency. Please note that this Notice of Rights is not intended to provide legal advice. Not all the legal proceedings detailed below may be an applicable or appropriate remedy. You may wish to consult an attorney regarding your legal rights.

RIGHT TO REQUEST ADMINISTRATIVE HEARING
A person whose substantial interests are or may be affected by the South Florida Water Management District’s (SFWMD or District) action has the right to request an administrative hearing on that action pursuant to Sections 120.569 and 120.57, Fla. Stat. Persons seeking a hearing on a SFWMD decision which does or may affect their substantial interests shall file a petition for hearing with the District Clerk within 21 days of receipt of written notice of the decision, unless one of the following shorter time periods apply: 1) within 14 days of the notice of consolidated intent to grant or deny concurrently reviewed applications for environmental resource permits and use of sovereign submerged lands pursuant to Section 373.427, Fla. Stat.; or 2) within 14 days of service of an Administrative Order pursuant to Subsection 373.119(1), Fla. Stat. "Receipt of written notice of agency decision" means receipt of either written notice through mail, electronic mail, or posting that the SFWMD has or intends to take final agency action, or publication of notice that the SFWMD has or intends to take final agency action. Any person who receives written notice of a SFWMD decision and fails to file a written request for hearing within the timeframe described above waives the right to request a hearing on that decision.

FILING INSTRUCTIONS
The Petition must be filed with the Office of the District Clerk of the SFWMD. Filings with the District Clerk may be made by mail, hand-delivery, or e-mail. Filings by facsimile will not be accepted after October 1, 2014. A petition for administrative hearing or other document is deemed filed upon receipt during normal business hours by the District Clerk at SFWMD headquarters in West Palm Beach, Florida. Any document received by the office of the District Clerk after 5:00 p.m. shall be filed as of 8:00 a.m. on the next regular business day. Additional filing instructions are as follows:

- Filings by mail must be addressed to the Office of the District Clerk, P.O. Box 24680, West Palm Beach, Florida 33416.
- Filings by hand-delivery must be delivered to the Office of the District Clerk. Delivery of a petition to the SFWMD’s security desk does not constitute filing. To ensure proper filing, it will be necessary to request the SFWMD’s security officer to contact the Clerk’s office. An employee of the SFWMD’s Clerk’s office will receive and file the petition.
- Filings by e-mail must be transmitted to the District Clerk’s Office at clerk@sfwmd.gov. The filing date for a document transmitted by electronic mail shall be the date the District Clerk receives the complete document. A party who files a document by e-mail shall (1) represent that the original physically signed document will be retained by that party for the duration of the proceeding and of any subsequent appeal or subsequent proceeding in that cause and that the party shall produce it upon the request of other parties; and (2) be responsible for any delay, disruption, or interruption of the electronic signals and accepts the full risk that the document may not be properly filed.
INITIATION OF AN ADMINISTRATIVE HEARING

Pursuant to Rules 28-106.201 and 28-106.301, Fla. Admin. Code, initiation of an administrative hearing shall be made by written petition to the SFWMD in legible form and on 8 and 1/2 by 11 inch white paper. All petitions shall contain:

1. Identification of the action being contested, including the permit number, application number, SFWMD file number or any other SFWMD identification number, if known.
2. The name, address and telephone number of the petitioner and petitioner’s representative, if any.
3. An explanation of how the petitioner’s substantial interests will be affected by the agency decision.
4. A statement of when and how the petitioner received notice of the SFWMD’s decision.
5. A statement of all disputed issues of material fact. If there are none, the petition must so indicate.
6. A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the SFWMD’s proposed action.
7. A statement of the specific rules or statutes the petitioner contends require reversal or modification of the SFWMD’s proposed action.
8. If disputed issues of material fact exist, the statement must also include an explanation of how the alleged facts relate to the specific rules or statutes.
9. A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the SFWMD to take with respect to the SFWMD’s proposed action.

A person may file a request for an extension of time for filing a petition. The SFWMD may, for good cause, grant the request. Requests for extension of time must be filed with the SFWMD prior to the deadline for filing a petition for hearing. Such requests for extension shall contain a certificate that the moving party has consulted with all other parties concerning the extension and that the SFWMD and any other parties agree to or oppose the extension. A timely request for extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

If the SFWMD takes action with substantially different impacts on water resources from the notice of intended agency decision, the persons who may be substantially affected shall have an additional point of entry pursuant to Rule 28-106.111, Fla. Admin. Code, unless otherwise provided by law.

MEDIATION

The procedures for pursuing mediation are set forth in Section 120.573, Fla. Stat., and Rules 28-106.111 and 28-106.401-.405, Fla. Admin. Code. The SFWMD is not proposing mediation for this agency action under Section 120.573, Fla. Stat., at this time.

RIGHT TO SEEK JUDICIAL REVIEW

Pursuant to Sections 120.60(3) and 120.68, Fla. Stat., a party who is adversely affected by final SFWMD action may seek judicial review of the SFWMD’s final decision by filing a notice of appeal pursuant to Florida Rule of Appellate Procedure 9.110 in the Fourth District Court of Appeal or in the appellate district where a party resides and filing a second copy of the notice with the District Clerk within 30 days of rendering of the final SFWMD action.

Application No. 140806-6

1.0 Location Map
2.0 Post Development Drainage Basin Map
3.0 Wetlands & Other Surface Waters documents
4.0 Construction Plans
The Osceola Corporate Center (OCC), Lot 8 project site is a proposed 16.54± acre multi-family complex generally located southeast of the intersection of Centerview Boulevard and John Young Parkway in Section 4, Township 25 South, Range 29 East in Osceola County, Florida. Lot 8 is located within the limits of the approved OCC Development of Regional Impact (DRI).

**Planting Plan**

The proposed site plan for Lot 8 requires grading within the upland buffer adjacent to wetlands W-12 and W-19. A total of 0.68± acre of upland buffer impacts are proposed (0.18± acre of upland buffer to W-12 and 0.50± acre of upland buffer to W-19). Once construction activities and grading in the buffer are complete, this 0.68± acre of disturbed upland buffer will be re-planted with native species including slash pine, wax myrtle and sand cordgrass.

The slash pine and wax myrtle will be alternated and installed on staggered 10-foot centers in two rows. The slash pine and wax myrtle specimens will be 3-gallon or 7-gallon, whichever is readily available at the time of planting. One-gallon specimens of sand cordgrass will be planted in a single row at the landward-most limit of the upland buffer and will be installed on 10-foot centers.

**Qualitative Monitoring**

The 0.68± acre of upland buffer plantings will be qualitatively monitored for a period of three (3) years. The monitoring events will occur on an annual basis in August/September, with an annual report provided to SFWMD on or before December 31 of each of the three years of monitoring. The following information will be recorded during each of the monitoring events:

1) The date, exact place and time of sampling measurements.
2) The person responsible for performing the sampling, measurements and analysis.
3) The analytical techniques or methods used.
4) The result of such analyses including:
   a) Photographs of the mitigation site;
   b) Status of nuisance and exotic species;
   c) Observed plant mortality;
d) A description of any issues observed during the monitoring event and proposed solutions.

Meandering transects will be used within each of the upland buffers to qualitatively assess the planted vegetation as well as naturally recruited vegetation. In addition to the vegetative monitoring, wildlife observations will also be recorded.

**Success Criteria**

The success criteria for the upland buffer plantings will be met when the buffers are vegetated with 80% desirable species. Nuisance and exotic vegetation will be maintained at 10% or less.

**Maintenance**

Maintenance activities will be conducted within ± the 0.68 acre of upland buffers on a quarterly basis to maintain nuisance and exotic vegetation at less than 10% coverage. Additional maintenance events will be employed as needed to maintain nuisance and exotic vegetation. Nuisance and exotic vegetation listed as Category I and II species in the Florida Exotic Pest Plant Council’s (FLEPPC) 2013 List of Invasive Plant Species will be targeted during the maintenance events.

**Work Schedule**

The following work schedule outlines the planting and monitoring plan for the 0.68 ± acre of upland buffers to be replanted.

<table>
<thead>
<tr>
<th>Month</th>
<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>June 2015</td>
<td>Installation of Upland Buffer Plants</td>
</tr>
<tr>
<td>September 2015</td>
<td>First Annual Monitoring Event</td>
</tr>
<tr>
<td>December 2015</td>
<td>Submittal of First Annual Monitoring Report</td>
</tr>
<tr>
<td>September 2016</td>
<td>Second Annual Monitoring Event</td>
</tr>
<tr>
<td>December 2016</td>
<td>Submittal of Second Annual Monitoring Report</td>
</tr>
<tr>
<td>September 2017</td>
<td>Third/Final Annual Monitoring Event</td>
</tr>
<tr>
<td>December 2017</td>
<td>Submittal of Third/Final Monitoring Report</td>
</tr>
</tbody>
</table>

This schedule assumes a construction start date in 2015. Should project construction be delayed, a modification to this work schedule will be requested to allow for a delay of monitoring activities as planting will not occur until construction has occurred.
**Estimated Costs**

The total estimated cost of the implementation of the wetland planting, maintenance and monitoring plan for a three year period is $7,810.00. The following details each point of the cost estimate:

<table>
<thead>
<tr>
<th>Planting</th>
<th>$2,500.00</th>

Re: Credit Reservation from Hatchineha Ranch Mitigation Bank
Project Name: Lot 8 Multi-family

Dear Mr. Roehlk:

This letter shall serve as your notice that five hundredths (.05) forested wetland credits have been temporarily reserved at Hatchineha Ranch Mitigation Bank, South Florida Water Management District Permit #53-00003-M, pursuant to and contingent upon your execution of and compliance with the terms of the attached Agreement. As stated in the Agreement, upon our receipt of the Final Purchase Price on or before January 30, 2015, the Credits will be transferred.

We appreciate the opportunity to serve your mitigation needs. Please do not hesitate to contact me if you have any questions.

Very truly yours,

Rebecca Perry
Central Florida Protection Manager

1. All crosswalks and sidewalks shall have a maximum 2% cross slope.

2. All sidewalks and hardscapes areas shall be constructed to provide positive drainage away from the buildings.

3. All grades shown at the edge of the sawcuts or at match points shall be field verified and any discrepancies should be reported to the engineer immediately for revisions.

4. All grades shown at the curb are bottom of curb elevations unless otherwise noted.

REVISIONS REPORTED

All grades are to be constructed to provide positive drainage away from buildings. Cross slopes shall have a minimum of 2% and any curbs shall have a maximum of 1%.

A WARNING: The curb elevations shown are the minimum floor elevations. It is the Contractor’s responsibility to verify all grades and verify before construction begins. The plan dimensions may have been reduced in size. Verify before construction begins.

NOTES
